

Adoption of

ESG LEADING PRACTICES is increasingly critical to BUSINESS SUCCESS

Many companies are ill prepared to ensure that they and their supply chains are practicing good ESG principles...

Why?

- ✗ *Assessments & questionnaires aren't current with ESG's evolving standards & recommendations*
- ✗ *Lack of continuous monitoring capabilities means data collected from point-in-time assessments & questionnaires is often stale*

These shortcomings increase vulnerability to business disruptions & reputational damage, plus leave companies unable to effectively mitigate the risks.

The constantly evolving nature of ESG is too dynamic to rely on reactive solutions

Companies need a proactive ESG solution to effectively gain the benefits of leading ESG practices, mitigate business disruptions & avoid reputation risks.

A proactive ESG solution will have:

- ✓ Comprehensive coverage: enterprise, third-party & location ESG factors
- ✓ A framework based on widely accepted and current ESG standards
- ✓ Continuous "always-on" monitoring
- ✓ Continuously updated, always-current ESG intelligence
- ✓ Anytime assessment capability with always-current ESG data

A proactive solution helps enterprises realize the benefits of good corporate citizenship & avoid disruption & reputational risk issues.
