

# Business Disruptions are Rising in Frequency & Severity

Unfortunately, most TPRM programs are limited and not equipped to handle the increased risks in a timely manner.

## DOES YOUR THIRD-PARTY RISK PROGRAM:

- Rely on static periodic assessments?
- Lack continuous monitoring?
- Ignore risks like ESG & location?
- Lack an integrated view of all risks?
- Rely on manual processes not automated risk actions?

## Accelerate Adoption of Continuous Monitoring

Move beyond inadequate TPRM practices to:

- Continuous Monitoring
- Single Pane Dashboard
- Continuous Risk Intelligence
- Leverage Data Science
- Comprehensive Risk Coverage
- Automate Risk Actions

# Always-on Monitoring

## EARLY DISRUPTION WARNING

### REAL-TIME ALERTING

Issued in real-time for risk events and when your risk landscape changes
